Maximise efficiency and minimise complexities

MYOB Advanced Business is a cloud Enterprise Resource Planning (ERP) system that connects every part of your business end-to-end to support business growth. Integrate job costing and project management with financial management to CRM to service management and sales orders to provide real-time coordination across your entire business. Combined with MYOB Advanced Payroll you can have centralised payroll and workforce management with ERP on a single cloud platform.

MYOB Advanced Business is built, developed and supported in Australia and New Zealand, and supports mid-sized organisations across a range of industries. MYOB Advanced Construction supports general contractors, home builders, land developers and subcontractors (relating to residential and

commercial construction). Construction businesses that have either outgrown their accounting software due to ongoing growth or who would like to move from desktop ERP, all look to MYOB Advanced Business as their next step.

With MYOB Advanced Business, you can manage your construction operations with ease anywhere, anytime on any device. For construction businesses who lack visibility across projects, experience difficulty in accurately tracking costs and have multiple project deadlines – MYOB Advanced Business is the cloud ERP platform that provides real-time progress updates and project visibility. Be able to generate accurate estimates and accurately track costs as well. Have complete oversight of projects so that issues are caught quickly resulting in fewer projects going over schedule.

“Thanks to MYOB Advanced, time-consuming processes and tasks are now automated.”

MYOB Advanced Construction key features

Contracts

Links between contract details and sub-jobs in the project plan include all change orders.

Budgets

Budgets directly link to contracts, accounting, and the project plan for managing hard and soft costs, change orders, profits, overheads, and fees in real time.

Job costing

Capture labour, material and equipment costs from any device providing instantaneous updates to keep project management and accounting in sync.

Change orders

Control changes of the project budgeted and committed values and control the profitability of every change initiated by a customer. The change order is a document for profitability analysis and an audit trail of changes to the project revenue budget, commitments, and budgeted costs.

Daily field reports

Streamline field management and ensure everyone is looking at the same information with time collection, subcontractor updates, job site visitors, issue and change request tracking and job site weather updates.

Project billing

Confirm details and automatically generate pro forma, progress, and time and material invoices from one screen, including quick billing.

Compliance

Manage insurance, certificates, and status updates, providing expiration and other alerts to staff and suppliers.

Payroll

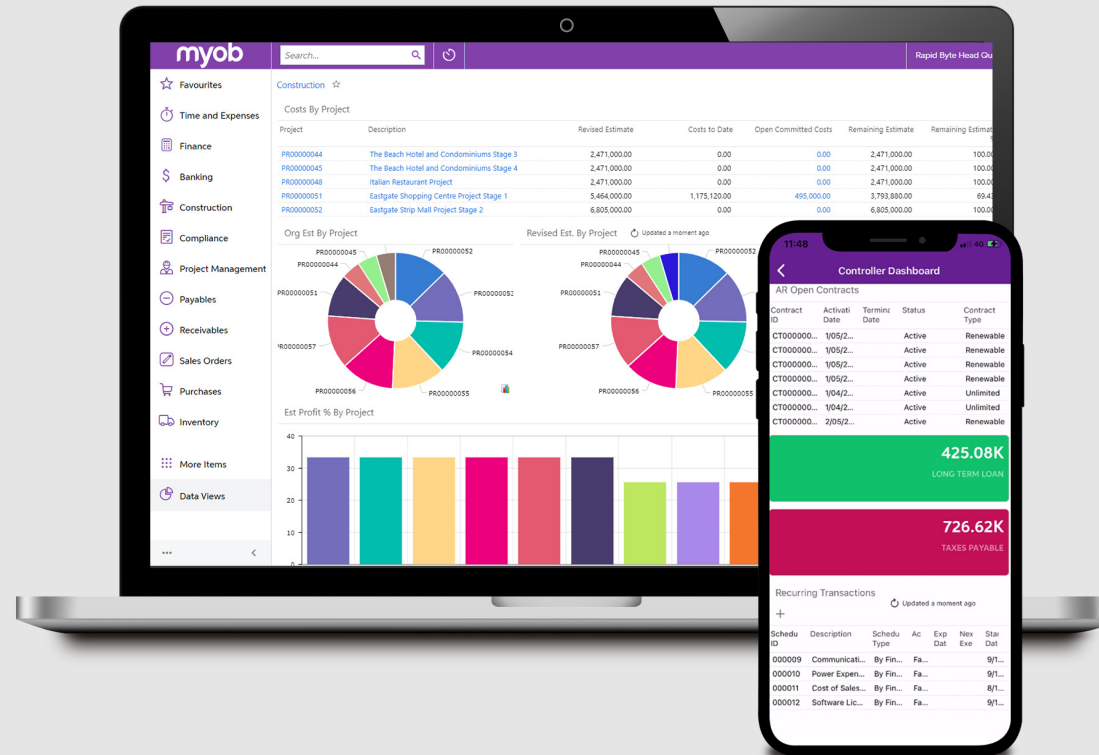

Support for multiple unions, locals, classes, benefit packages, and complex wages, as well as certified wages and executive

Retentions

For both accounts receivable and payable, manage initial retentions and any changes to streamline invoicing and payments. Retention tracking is supported for progress billing and time and material billing of projects. Plus, project cost commitments are calculated with respect to retainage in purchase orders.

Mobile App

Capture time, expenses, project issues, change requests and more. Productivity will increase making your construction projects run even smoother.

Summary

Construction businesses are always looking for ways to improve efficiency and boost productivity. Manage projects from start to finish, from anywhere on any device.

MYOB Advanced Business delivers end-to-end business management software designed to meet the needs of Australian and New Zealand construction businesses. Everything you need to effectively streamline time-intensive processes to avoid delayed projects, accurately track costs and create estimates to avoid going over budget are all accessible through a single cloud platform, giving you complete project visibility in real time and full control.

Whether your business requires a system that supports ongoing business growth, managing multiple systems have seen an increase in business challenges or you've seen the benefits of using a cloud platform over on-premise, MYOB Advanced Business meets the needs of your business.

“That will really help us grow and drive us in the right direction too. It gives us confidence that MYOB Advanced is the right piece of software for our business.
